

ADS-B Out Package Pricing Incentive

Equipment from Universal Avionics and Rockwell Collins

Affordable and Integrated Package Solution to Meet ADS-B Out Mandate

This exciting package program includes a Universal Avionics SBAS-Flight Management System (FMS) upgrade and Rockwell Collins TDR-94(D) Mode S Transponder, together providing equipage requirements to meet the upcoming Automatic Dependent Surveillance-Broadcast (ADS-B) Out mandate.

Meet the mandate. Add value to your aircraft. Take advantage of this limited-time incentive today!

Unlike other standalone solutions, this incentive program package offers:

- Data Link for current and future mandates (FANS, ACARS, European DLS Mandate, FAA Data Comm)
- Localizer Performance with Vertical Guidance (LPV)
- Current and future Performance-Based Navigation (PBN) requirements
- ADS-B Out Failure messaging displayed on the FMS (SCN 1000.7 and later), eliminating the need for costly standalone annunciators
- ADS-B Out Data Pairing Package available to UA Authorized Dealers and Integrators at no charge, further reducing installation cost

Details

- Valid for new orders placed January 1, 2019 through December 31, 2019
- Orders must be shipped by February 28, 2020
- Order must include at least one Rockwell Collins TDR-94(D) Mode S Transponder with at least one Universal Avionics SBAS-FMS (UNS-1Ew, -1Espw, -1Fw or -1Lw)
- Aircraft with existing Universal Avionics Control Display Units (CDU) and Data Transfer Units (DTU) may be retained depending upon version, and combined with other incentive programs. Ask your Universal Avionics Regional Sales Manager for details.
- Installation center must be a Universal Avionics and Rockwell Collins Authorized Dealer
