

EGNOS Upgrades: Secure Your Funding Today

Universal Avionics EGNOS-compatible SBAS-FMS features an extremely precise, internal SBAS GPS receiver that improves accuracy and integrity of GPS-derived position information. With new EGNOS funding options available, now is the perfect time to upgrade!

Benefits of EGNOS

- Reduced delays and diversions
- Reduced fuel burn
- Access to new destinations served by LPV / APV approaches
- Improved safety – precision navigation means lower probability of CFIT
- Enables advanced procedures such as curved approach paths
- More accurate lateral and vertical guidance

Equip With SBAS-FMS

- Embedded EGNOS receiver in the FMS
- Three-dimensional coupled LPV approach
- Meets the sensor position and integrity requirements for ADS-B Out
- Ensures compliance with P-RNAV requirements
- Easily upgradeable from existing Universal Avionics FMS installations
- Key element of PBN and RNP / RNAV, and the Single European Sky initiative
- Compatible with the other regional SBAS around the world: WAAS, MSAS and GAGAN

SBAS-FMS Family – LP/LPV Monitor, UNS-1Lw, MCDU, -1Fw and -1Ew

Proven retrofit solutions on over 50 aircraft types

- ATR 42 & 72
- Bombardier Learjet Family
- Bombardier Q400 & Dash 8 Series
- British Aerospace Jetstream 41 & RJ Series
- Cessna Citation Family
- Dassault Falcon® Family
- Embraer ERJ 145 Family
- Eurocopter AS332L/L1 Super Puma & AS365 Dauphin
- Saab 340
- Sikorsky S-76 & S-92

2018 Funding Available

The European GNSS Agency (GSA) recently launched the third Call for Proposals to further the adoption of EGNOS in aviation. The purpose of the call is “to award a number of grants to foster EGNOS operational implementation.”

Be sure to take advantage of the available grant money for regional, commercial, business (corporate), general and rotorcraft aviation operators to equip with SBAS technology.

FAQ's
